8/10 - Aggressive

* Please refer to brochure for full details of charges

Please note underlying fund charges are in addition to the charges listed above.

Key objectives

This is a specialist investment strategy aimed at producing long-term growth through investing in a number of key themes that we believe will be key economic drivers for the 21st century. Major themes include investing in companies exploiting the opportunities within traditional and alternative fuel sources. The strategy will also concentrate on the potential global shift of economic power in the 21st century. Key areas include China and India as well as other emerging economic areas. The asset allocation will be managed geographically and by investment themes.

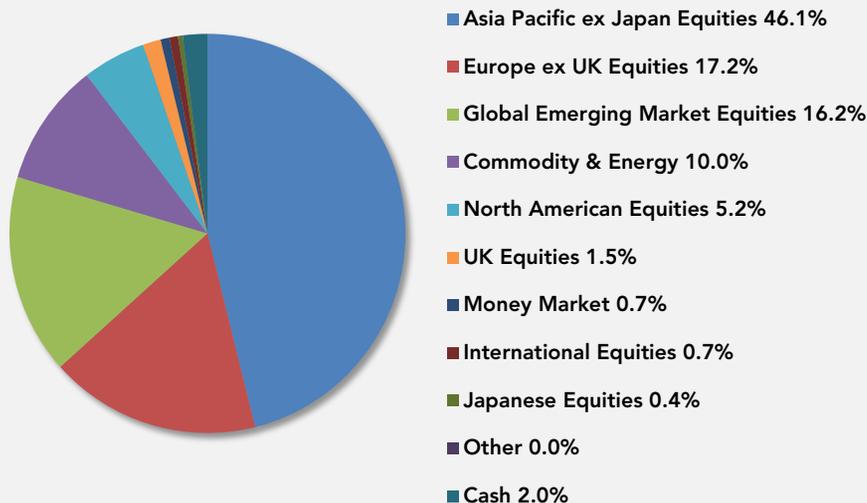

Investment manager's comment

	Looking Back: Whilst the strategy rose in value over the summer, it marginally underperformed the benchmark ARC £ Equity Risk PCI, which returned 1.3%.
	Best performing holding: The best performing holding over the summer was MFM Junior Oils Trust I Acc, which returned 13.8%. This holding benefited from a strong rise in the oil price witnessed during the quarter.
	Worst performing holding: The worst performing holding over the reporting period was GAM Star China Equity Inst Shares GBP Acc, which returned -10.9%. Following strong performance in 2017, it has been a more difficult environment for the Chinese market with slowing economic growth and trade wars weighing on Chinese shares.
	Portfolio Changes: No changes were made to the holdings within the portfolio over the reporting period.
	Looking Ahead: The fund produced a positive return during a mixed investment climate for the key themes it follows. although it lagged it's benchmark primarily due to a difficult period for emerging markets. However, as longer term investors it is important to look through the shorter term quarterly movements in financial markets, positive or negative, and focus on the portfolio's longer term objectives. We continue to believe over the longer term the portfolio is well placed to deliver an attractive total return, with an emphasis on more speculative investments, and longer term capital growth, within an aggressive, higher risk risk profile.

Performance Table	0-12m	12-24m	24-36m	36-48m	48-60m	5 Year Cumulative	Volatility (3 Years)
PMS Energy & Global Shift - Risk 8	1.5%	11.7%	28.6%	-20.9%	7.9%	24.4%	12.3%
ARC £ Equity Risk PCI	6.2%	10.7%	15.9%	-0.5%	6.2%	44.0%	6.4%

Asset allocation - Portfolio breakdown

(at 30th September 2018)

Source: Financial Express 30th September 2018. Asset allocation numbers may not add up to 100% due to rounding. Negative asset allocation can occur due to the underlying positions employing hedging strategies.

Current holdings

- Artemis Global Energy
- GAM Star China Equity
- Hermes Asia Ex Japan Equity
- JPM Emerging Markets Income
- Jupiter Emerging European Opportunities
- MFM Junior Oils
- New India IT
- ScotGEM IT

Risk Profile 8/10 - Aggressive

This is an aggressive strategy which will invest up to 100% of monies in specialist areas of the stockmarket and other high risk investment areas. Investors must accept that it may experience significant losses of capital over certain time periods. In this strategy there may be additional risks such as stock specific risk from direct equity exposure and currency fluctuations via investment in overseas markets. Investors accept a high level of risk with a view to potentially receiving higher returns over the long term.

Whitechurch Risk Ratings

Risk is defined as the risk to the capital or original investment (based on a minimum 5 year investment term). Whitechurch provides a risk rating of portfolios on a scale of 1 to 10. (1 being the lowest risk and 10 being the highest risk). Full guidelines are available in the Whitechurch Portfolio Management Service brochure.
