

Portfolio Management Service - Dynamic Growth

Key Facts

As at 31st March 2019

Launch date - 1st September 2012

Minimum investments

- If investing directly with Whitechurch:
 - Lump sum £3,000 (incl. transfers)
 - Regular savings £100 per month
- Different minimum amounts may apply if investing through a platform

Whitechurch Initial Fee

0% of amount invested

Whitechurch Annual Management Fee*

- If investing directly with Whitechurch the fee is 0.10% per annum of the portfolio value (+VAT)
- If investing through a platform the fee is 0.20% per annum of the portfolio value (+VAT)

Custodian Fee*

- If investing directly with Whitechurch the custodian fee is 0.40% per annum of the portfolio value (charged monthly). This is capped at £1,000
- If investing through a platform there will be no Whitechurch custodian fee, however, a platform fee may apply

Advisory Fees*

To be agreed with Financial Adviser

Income

Income generated can be withdrawn or reinvested back into the portfolio.

* Please refer to the direct or platform service brochure for full details of charges.

Please note underlying fund charges are in addition to the charges listed above.

Key objectives

This strategy is focused towards providing long-term growth from a globally diversified stockmarket focused portfolio. This will be primarily made up of index tracking 'passive' funds, with a strict limit on exposure to active funds capped at 20%, as minimising charges is of paramount importance. The mix of funds will be actively managed based on the Whitechurch investment team views.

NB: This strategy is available directly from Whitechurch and through external platforms.

Investment manager's comment

	Looking Back: The portfolio made 8.2% over the previous three months, outperforming the benchmark, ARC £ Equity Risk PCI, which returned 7.9%.
	Best performing holding: This was L&G US Index Inst Inc, which returned 12.3%. Optimism returned to US markets over the quarter as the US Federal Reserve surprised investors by backing away from its pledge to aggressively increase interest rates throughout 2019. This eased concerns that higher US interest rates would lead to a recession later next year.
	Worst performing holding: This was the strategy's safe haven exposure, Vanguard US Government Bond Index Inv Inc GBP, which returned -0.2%. Following a strong period of performance in the final quarter of 2018, the position was flat as investors' appetite for risk increased and safe haven assets were out of vogue.
	Portfolio Changes: No changes were made to the holdings within the portfolio over the reporting period
	Looking Ahead: Financial markets enjoyed some strong performance over the reporting period, and it was pleasing to see the strategy outperform its benchmark in this environment. However, as longer term investors it is important to look through the shorter term quarterly movements in financial markets, positive or negative, and focus on the portfolio's longer term objectives. We continue to believe over the longer term the portfolio is well placed to deliver an attractive total return through a blend of passive and active investment strategies, within a higher risk profile.

Performance Table	0-12m	12-24m	24-36m	36-48m	48-60m	5 Year Cumulative	Volatility (3 Years)
PMS Dynamic Growth - Risk 7	5.1%	2.6%	25.6%	-4.4%	12.7%	45.9%	9.3%
ARC £ Equity Risk PCI	5.9%	1.8%	19.1%	-3.1%	8.8%	35.4%	7.5%

Source: FE Analytics, Whitechurch Securities. Performance figures are calculated net of fees in sterling. Unit Trust prices are calculated on a bid-to-bid basis. OEICs & Investment Trust prices are calculated on a mid-to-mid basis, with net income reinvested. The past is not necessarily a guide to future performance. The value of investments and any income will fluctuate and investors may not get back the full amount invested. Currency exchange rates may affect the value of investment.

Asset allocation - Portfolio breakdown

(at 31st March 2019)

Source: Financial Express 31st March 2019. Asset allocation numbers may not add up to 100% due to rounding. Negative asset allocation can occur due to the underlying positions employing hedging strategies.

- Vanguard FTSE UK Equity Income Index
- Vanguard Global Small-Cap Index
- Vanguard US Government Bond Index
- Cash

For further information about any of the areas included in this or any of our other strategies in the Portfolio Management Service please contact your Financial Adviser.

Risk Profile 7/10 - High Risk

This is a higher risk strategy that can invest up to 100% of monies into stockmarket investments. Consequently, investors must accept that it may experience material fluctuations and losses of capital do occur over certain time periods. In this strategy there may be additional risks such as stock specific risk from direct equity exposure and currency fluctuations via investment in overseas markets. Investors accept a higher level of risk with a view to potentially receiving higher returns over the long term.

Whitechurch Risk Ratings

Risk is defined as the risk to the capital or original investment (based on a minimum 5 year investment term). Whitechurch provides a risk rating of portfolios on a scale of 1 to 10. (1 being the lowest risk and 10 being the highest risk). Full guidelines are available in the Whitechurch Portfolio Management Service brochure.
